

ANCHAL SHUKLA

Full Stack Developer

+91 7999519713 | anchalshukla423@gmail.com | LinkedIn | Github | Leetcode | GeeksforGeeks

Career Objective

Full Stack Developer (MERN + Java/Spring Boot) and final-year CSE student with hands-on experience shipping **production-style applications** end to end. Runner-Up at BGI National Hackathon (600+ teams, 2,800+ candidates) and 2nd Runner-Up + SaaS & Enterprise Domain Award winner at Buildverse Hackathon 2026. **Top 1%** NPTEL rank in Data Structures & Algorithms. Seeking an **SDE-1** / Full Stack role to build scalable, secure web applications

Education

Rajiv Gandhi Proudhyogiki Vishwavidyalaya <i>Bachelor of Technology in Computer Science Engineering</i>	Sep. 2023 – July 2027 8.39/10
M.P. Board <i>Senior Secondary (XII)</i>	July 2022 – April 2023 89.4%
M.P. Board <i>Secondary (X)</i>	July 2020 – April 2021 95%

Technical Skills

Languages: JavaScript, Java, SQL, HTML5, CSS3

Frameworks/Technologies: Spring Boot, React.js, React Native, Expo SDK, Node.js, Express, Bootstrap, REST APIs

Databases MongoDB, PostgreSQL, MySQL, Redis

Tools & Platforms : Git, Github, Docker, Vercel, Render, Railway, Supabase, Postman, Neon

Core Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Projects

- Vyom** | *React Native, Expo SDK, Node.js, Express, PostgreSQL* | GitHub · Live Demo **May 2026**
- Built a modular frontend codebase using **React Native** and **Expo SDK**, integrating comprehensive product discovery modules, persistent carts, and active wishlist collections.
 - Engineered social media core pipelines supporting multimedia post creation, seller profile storefronts, and ultra-low-latency real-time **live-streaming** commerce blocks with **optimisation** for smoother playback and **performance issue** mitigation through profiling and targeted fixes.
 - Integrated a secure payment gateway implementing high-performance transaction handling with an optimized **one-tap express checkout** mechanism for frictionless purchases applying **security** best practices and robust validation to protect **websites** and user data.
- BGI Launchpad** | *React.js, Java, Spring Boot, MySQL, AWS, Docker* | GitHub · Live Demo **December 2025**
- Architected a **software application** integrating a responsive React.js frontend with a scalable backend using layered architecture for campus management modules in a production-ready **web application** setup.
 - Built and tested REST APIs for CRUD operations, ensuring clean request handling and modular service logic for **maintenance** and future feature expansion.
 - Deployed the backend on cloud using **AWS EC2** and configured MySQL for a production-like environment, applying devops deployment discipline with **website security** considerations.

Certifications / Achievements

NPTEL Silver Badge: Data Structures and Algorithms; secured a position among the **Top 1%** of candidates.

GFG 160 Days Challenge: Completed 160-day streak of algorithmic problems, **700+ problems solved** across LeetCode and GeeksforGeeks .

Leadership / Extracurricular

- BGI National Hackathon** **2026**
Team Leader *Bhopal, M.P.*
- Led a dynamic team and achieved **Runner-Up** status out of 600+ participating teams and 2,800+ national candidates.
 - Directed technical strategy, task delegation, and the project presentation pipeline under competitive milestones **collaborating** effectively with designers to align **ui** and **user experience**.
- Buildverse Hackathon** **2026**
Team Leader *Bhopal, M.P.*
- Achieved **2nd Runner-Up Overall** by delivering an innovative, scalable solution with strong technical implementation and business impact.
 - Won the **SaaS & Enterprise Domain Award** for designing and building a high-impact enterprise-focused solution that addressed real-world industry challenges with a focus on **security**, **optimisation**, and reliable **websites** delivery.
